

# Info Flyer – VPN Token Migration

For technical and cost optimization reasons SMA is migrating to a new One Time Password (shortly OTP) Solution.

The old ActiveIdentity (white) tokens will be replaced by digital SafeNet Smart Grid Code (pattern). These Grid Codes will be generated on the SSL-websites by selecting a personal sequence on top of a dynamically changing grid diagram.

Please use the step by step Instructions on the next page to activate your new Grid Code.

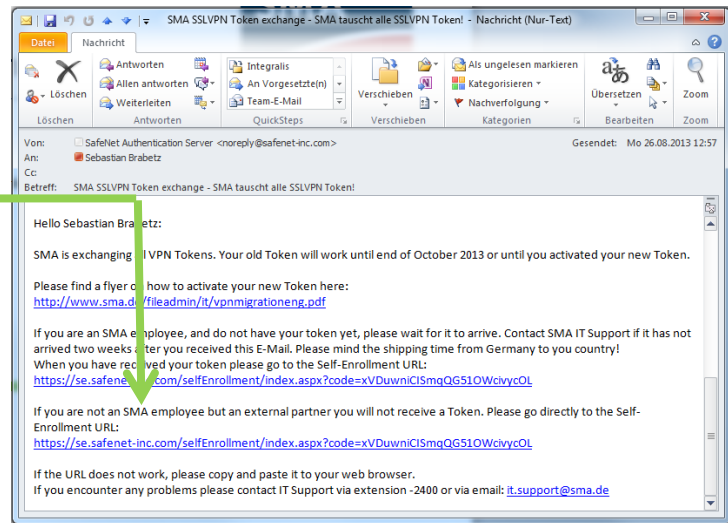

## Important:

- The old (white) token will work until March 31<sup>st</sup> 2014.
- After activating the Grid Code do not use the old (white) token any longer as this leads to an automatic locking of your VPN access!
- The self-service email/link will be valid for 4 Weeks.
- **Make sure that you send back the old OTP Token!**  
 If you are located in a subsidiary please send back the old tokens in one batch via your local IT coordinator.  
 If you are located in Niestetal please send the Token to IT Service via internal mail.

## Grid Code self-assignment procedure

Please click on the self-service enrollment URL in the email.

When clicking on the link you will see the self-enrollment page for Smart Grids.

### SMA Solar Technology AG Token Self-Enrollment

D	p	V	P	W	U
2	G	e	T	a	N
H	B	o	i	J	0
M	f	3	A	Q	q
k	X	F	j	b	8
m	4	n	s	L	v

Select a PIP using the grid. Try to pick a pattern that would not be easily guessed by someone else. Minimum PIP Length: 6.

Enter Value:

Here you have to select a random sequence in the grid (example manually marked blue in the following screenshot).

Now please enter the selected Grid Code (PIP) in the text box below.

Select a PIP using the grid. Try to pick a pattern that would not be easily guessed by someone else. Minimum PIP Length: 6.

m4nF3oiJQb

The next step verifies that the Grid sequence is configured successfully.

Your token has been successfully activated. Please remember your User ID below.

User ID : Test

Close

The new Grid sequence can now be used for the SSLVPN Website to generate Grid Codes!

**Remember your Grid sequence and not the Code!**
